# Eminent Names in Green Hydrogen Converged The Inaugural Edition Organised by SDLC & Infinity Expo in September 2022 to Devise Clean Energy Strategies for India

## On 08 & 09 Sep, 2022 240+ Delegates and 52+ Speakers

The Green Hydrogen Summit held in September 2022 brought together industry experts, thought leaders, and policymakers to discuss and decode various forms of hydrogen production and devise green hydrogen strategies for India.

The event featured distinguished speakers with his excellency Hans Jacob Frydenlund, Norwegian Ambassador emphasizing the importance of India in the overall adoption of Hydrogen with India being key to change. Cristian Valdes Carter, Country Director Innovation Norway, provided valuable perspectives on the strategic communications aspects of green hydrogen, highlighting its importance in creating awareness and driving adoption.

Discussions centered around financing green hydrogen projects. Notable participants included representatives from the World Bank, KfW, GIZ, and the London Stock Exchange. These organizations shared their perspectives on the financial aspects of green hydrogen development, including investment opportunities, funding mechanisms, and potential collaborations with key takeaways being bringing in intermediary commodity risk agency backed by Govt, to jump start the market.

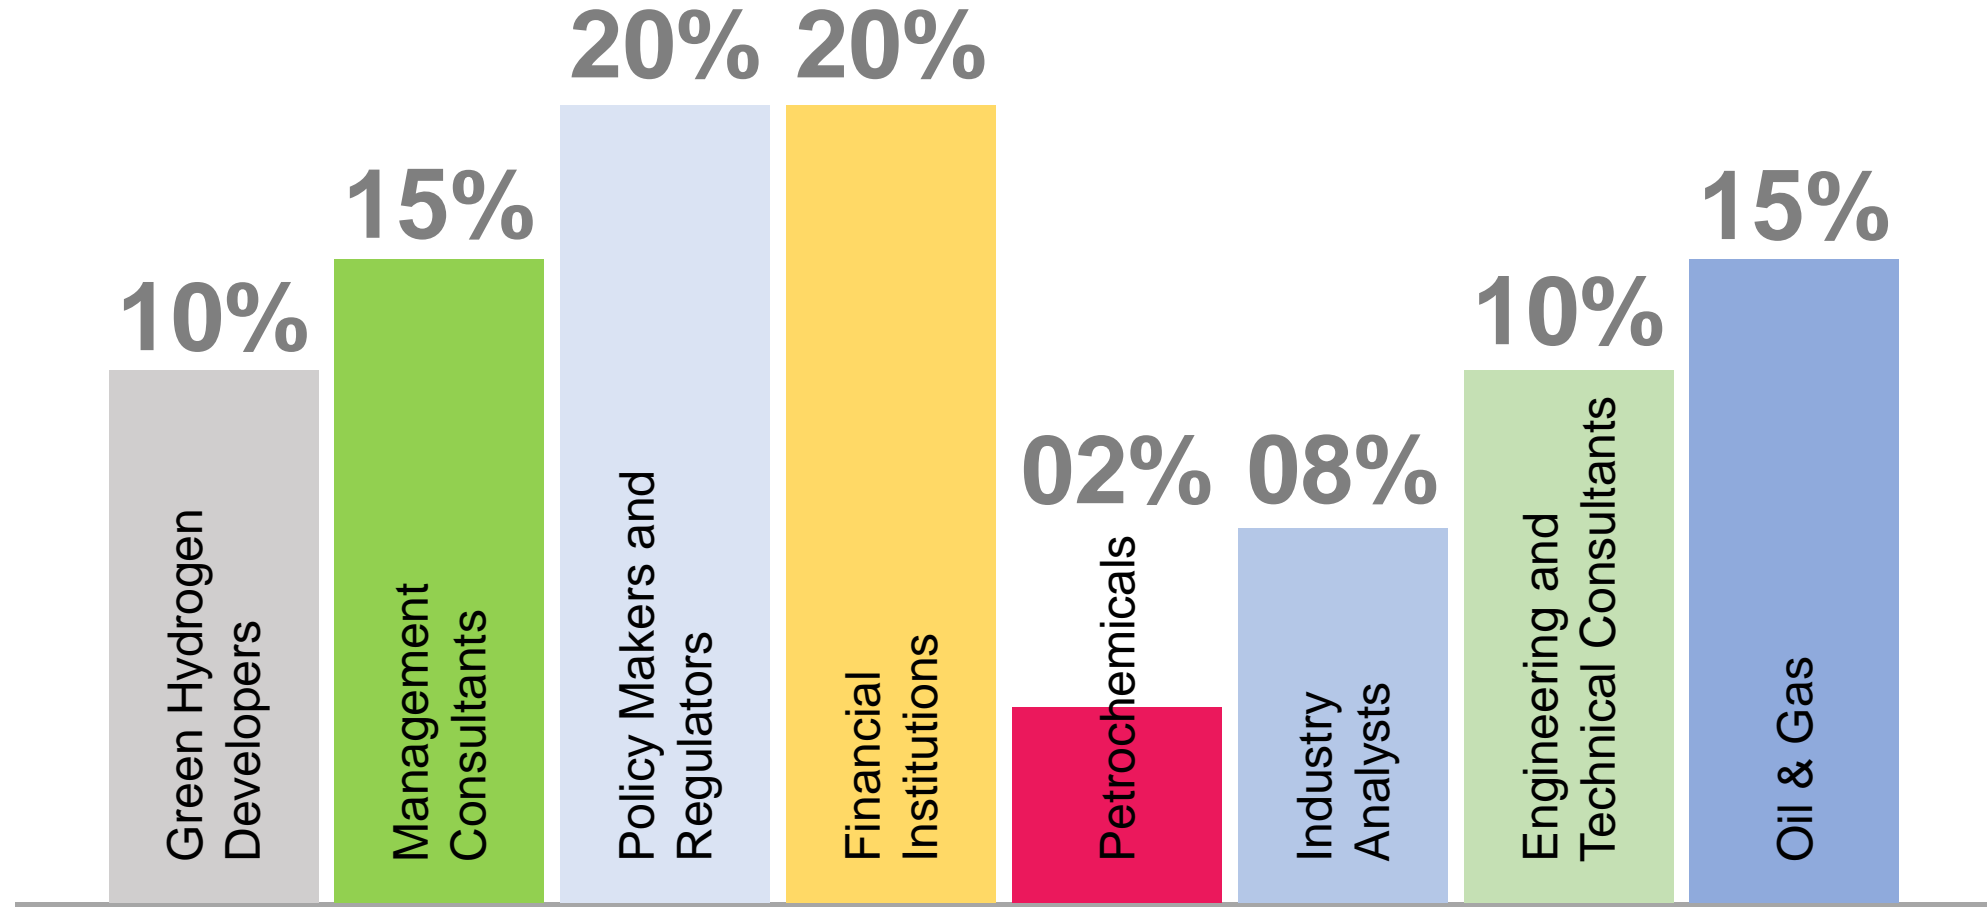

After some invigorating panel discussion the Gh2 Summit witnessed many integrated sessions, discussions and debates for holistic learning. CTO from Tata consultancy Engineers Atul Choudhari, spoke about future of Hydrogen.

The inclusion of presentations on Future Ports as sustainable energy hubs and emerging hydrogen production technologies during the Green Hydrogen Summit further expanded the scope of discussions. It allowed participants to explore additional dimensions of the green hydrogen ecosystem and the potential for advancements in related areas that could contribute to the broader goals of decarbonization and sustainable energy transition.

Overall, the 2 Day, Green Hydrogen Summit culminated on a positive note, the participants walked away with actionable insights on how to build market match the right technology and attract investments. With, more than 200+ thought leaders exclusively in one place in one time, the GH2 Summit has become a platform to meet thought leaders and take a step forward for the future of India's energy security .

# Attendee Profile

Attendees Included Country Ambassador, CXOs, Chairman, Key Decision Makers From Following Functions –Technology | Business Finance | Energy Companies | Industry Bodies

# Speaker Testimonials 2022

---

Hans Jacob Frydenlund,  
Norwegian Ambassador

The conference was very organized with a stellar band of speakers. Development of green hydrogen in India is the key with set of challenges in production of Hydrogen and its usage.

Erik Solheim  
Former UN Environment  
Executive Director

The conference was very organized with a stellar band of speakers. India has the opportunity to completely decouple carbon emission from agriculture.

Vineet Mittal  
Chairman, Avaada Group

Glad to be part of the conference. India should play to its own strength and rest of the world should allow it. Talked about India's big grid strength to absorb intermittent power and supply reliable 24x7 power for electrolysis

# Speaker Testimonials 2022

---

Cristian Valdes Carter  
Country Director Innovation  
Norway

This is testimony from me: Thank you infinity for giving the opportunity to be part of this event, GH2 is one platform which unites Industry, Government and Research

Amrit Singh Deo  
Sr. Managing Director  
FTI Consulting

This is testimony from me : Thank you infinity for giving the opportunity to be part of this event, I recommend we should take best practices from global markets and instead of large projects take small steps, create consortia - SPVs with state and central government.

Surbhi Goyal  
Senior Energy Specialist  
World Bank

This is testimony from me: Thank you infinity for giving the opportunity to be part of this event. I suggest we should work onboarding of stake holders with Guarantee of origin, strategy of financial instruments, buying back of green hydrogen, is very important.
